The main difference between the two programs is that Photoshop CC is $9.99 for a yearly subscription, while Lightroom CC is free. This means that if you are a beginner, you will get more bang for your buck by going with the least expensive version of Photoshop. If you want full access to Photoshop's features but don't want to pay for a yearly subscription, you can use a free trial version of Photoshop. Unlike Photoshop CC, though, a free trial doesn't give you access to all of the advanced features. You can, however, get a feel for the program's capabilities and download it to your computer to use on your own. For this reason, this option is less useful for the beginner. When it comes to choosing between different versions of Photoshop, it can be tough to choose which one is best for you. Whoever said that only a limited number of people are magic is wrong, as Photoshop allows you to bring your dreams into life, any way you see them. With a variety of projects, images, and techniques, you will find a method to your own creativity. There's also a DVD included with every book to help you accomplish the task at hand. This feature allows you to separate retouching from the original image, and it works seamlessly. With Smart Cloning, you can clone an area of an image, select your target and just from there, and voila, you have a layer containing the edited part of your image. With Retouch, you can correct the overall quality of the image, and you can also enhance it with the best features and tools. It includes tools such as Spot Repair, Shadow Control, Gradient Filter, and Lasso tool. Lasso tools are a very useful tool when you want to focus on the area in the image that needs work and remove it completely. With the Lasso tool, you can also dodge and heal the area - something that was not possible with any photo editing software. Photoshop also offers the options of resize, rotate, and crop. Here is a list of the tools inside the out option that are used for creating and editing images. For example, when you want to convert an image to jpeg, you choose the option "Save for Web & Devices" and then select the jpeg option, and then finally save the file. When you create an image, if you want to make it kind of your own, you can use Filter > Liquify Tools > Liquify. This tool is not available in the 2018 update, but is available in 2019 and above.
